AndSoOn CRM System

1. EXECUTIVE SUMMARY

TheAndSoOnCRM(Customer Relationship Management) System is a comprehensive, end-to-end solution designed specifically for the gift setting and premium gifting business. This system streamlines operations from lead generation through order fulfillment, inventory management, billing, and customer delivery tracking. Built to support multiple customer segments including B2B (corporate gift supplies), B2C (individual customers), and wholesale operations, the AndSoOn CRM provides a unified platform for managing customer relationships, orders, and business operations.

2. BUSINESS OVERVIEW

2.1 Company Information

Client Name: AndSoOn

Business Focus: Premium Gift Setting & Gifting Solutions

Website: <https://andsoon.in/>

Primary Product Lines: Guilt-Free Sharing Combos featuring Top-Grade Raisins, Nutri-Rich Chocolate Peanuts, Kerala Cream & Onion Banana Chips, Kerala Pepper Garlic Banana Chips, and comprehensive gift wrapping materials etc.

2.2 Target Customer Segments

Segment	Description
B2B Corporate	Employee gift programs, bulk corporate purchases
B2C Direct	Personal gifts, family occasions
Wholesale	Bulk orders for resale
Referral/Direct	Company staff, family, friends

3. CORE SYSTEM FEATURES & WORKFLOW

3.1 Lead Management System

Objective: Capture, track, and convert leads from multiple channels into confirmed orders.

Lead Sources:

- WhatsApp messages and conversations
- Website inquiry forms and contact pages
- Shopify store integrations
- Amazon marketplace platform
- Direct referrals (company staff, family, friends)
- Admin manual lead creation

Lead Statuses:

- **Pending:** New leads awaiting initial contact
- **In Progress:** Active follow-ups and negotiations
- **Completed:** Converted to confirmed orders
- **On Hold:** Paused leads with potential to revive
- **Cancelled:** Rejected or expired leads

Sales Team Responsibilities: The sales team manages all lead follow-ups, communicates with prospects, and handles status updates. Admin can assign leads, modify details, and adjust statuses as needed.

vandmark

3.2 Customer Management & Deduplication

Unique Identification: Customers identified by mobile number or email address to prevent duplicates.

Example: Customer 'Rajesh Kumar' via WhatsApp (+91-9876543210) places an order. Later, he uses the website with the same phone number. The system recognizes this as the same customer and retrieves his complete order history without creating a duplicate record.

3.3 Order Management & Processing

Order ID Format: AS00001, AS00002, AS00003, etc.

Order Processing Workflow:

- **Lead Conversion:** Lead confirmed and converted to order
- **Estimate Generation:** Admin creates estimate with all costs
- **Customer Confirmation:** Customer reviews and approves estimate
- **Order Creation:** Unique Order ID assigned (AS00001)
- **Fulfillment:** Production team begins packing and customization
- **Quality Check:** Order completeness and quality verified
- **Delivery Scheduling:** Order scheduled for delivery
- **Delivery & Receipt:** Order delivered with receipt

3.4 Inventory Management System

Purpose: Maintain complete control over stock levels, product details, pricing, and service offerings.

Components:

- **Products:** Premium Raisins (kg), Chocolate Peanuts (pack)
- **Services:** Custom Gift Wrapping, Video Editing, Decoration
- **Pricing:** Cost per unit, bulk discounts available
- **Measurement Units:** Weight (kg, g), Count, Length (meter)
- **Additional Charges:** Packing (Rs.100), Delivery (Rs.50-200)
- **Stock Alerts:** Notifications when stock < 10 units

3.5 Billing & Invoice Management

Billing Process:

- **Create Estimate:** Admin generates initial estimate with all costs
- **Customer Approval:** Customer reviews and approves amount
- **Generate Invoice:** Formal invoice created with Order ID
- **Send Invoice:** Invoice sent via WhatsApp and Email
- **Customizable Charges:** Admin can add/remove charges (taxes, packing, delivery)
- **Receipt Generation:** Receipt shows paid and pending amounts

B2B Example - Corporate Order:

Company XYZ orders 50 Gift Combos

- Product Cost: $\text{Rs.}3,999 \times 50 = \text{Rs.}1,99,950$
- Custom Gift Wrapping: $\text{Rs.}50 \times 50 = \text{Rs.}2,500$
- Delivery: $\text{Rs.}500$
- GST (5%): $\text{Rs.}10,222.50$
- **Total: Rs.2,13,172.50**
- Payment: 50% advance, 50% on delivery

B2C Example - Individual Order:

Anniversary gift box purchase

- Anniversary Gift Box (5 items): $\text{Rs.}3,999$

Customer Bill: Rs.3,999

(Admin tracks packing, delivery, customization internally)

3.6 Payment Management & Partial Payments

Flexibility: System supports full and partial payments.

Order Total: $\text{Rs.}3,999$ | Customer pays advance: $\text{Rs.}1,000$

Receipt shows: Amount Received: $\text{Rs.}1,000$ | Remaining: $\text{Rs.}2,999$

Payment Methods: UPI, Bank Transfer, Card Payment, Cash on Delivery (COD), Manual Entry

3.7 Reminders & Follow-up System

Automated Reminders:

- **Event-Based:** 7 days before birthdays/anniversaries/special events
- **Delivery Reminders:** 1 day before scheduled delivery
- **Payment Reminders:** Before payment deadline
- **Reorder Reminders:** Seasonal or regular customers
- **Lead Follow-ups:** Daily/weekly reminders for sales team

Delivery Channels: WhatsApp (primary) and Email (secondary)

3.8 Dashboard & Analytics

Dashboard Components:

- **Lead Overview:** Pending, in-progress, completed, cancelled leads
- **Order Metrics:** Orders created, pending, delivered
- **Delivery Schedule:** Orders due today, tomorrow, next week
- **Inventory Status:** Current stock levels, low stock alerts
- **Revenue Dashboard:** Daily, weekly, monthly revenue metrics
- **Team Performance:** Sales metrics and conversion rates
- **Payment Status:** Fully paid, partial payment, pending payments

3.9 Data Export & Reporting

Export Capabilities: Complete customer database, Orders with transaction details, Inventory and stock reports, Revenue and payment reports, Lead source analysis

Format: Excel (.xlsx) for analysis, reporting, and business intelligence

3.10 Bulk Communication & Marketing

- **Promotional messages to customer segments**
 - Birthday & anniversary greetings
 - New product announcements
 - Seasonal offer campaigns
 - Delivery & order status updates

4. MARKETING & SALES CHANNELS

Multi-Channel Sales Integration:

- **Website (andsoon.in):** Direct form submission -> Lead -> Order
- **Shopify Store:** Order synchronization -> CRM orders
- **Amazon Marketplace:** Automated sync via Shopify -> CRM
- **WhatsApp Business:** Direct message leads -> Follow-up
- **Direct Referral:** Manual admin creation -> Order
- **Admin Panel:** Custom lead source tracking

5. USER ROLES & PERMISSIONS

Role-Based Access Control:

- **Super Admin:** Full system access, manage all users, system configuration, access all reports, billing management
- **Admin:** Lead & order management, customer management, inventory control, billing oversight, team coordination
- **Sales Team:** View assigned leads, update lead status, follow-up management, generate estimates, view order history
- **Production Team:** View assigned orders, update fulfillment status, track inventory usage, quality checks
- **Finance Team:** Invoice generation, payment tracking, expense management, financial reports, data export

Security & Audit Trail:

User login/logout tracking, order modification history with timestamps, payment transaction logs, lead status change audit trail, inventory adjustments, admin action logs, and data encryption with role-based access control.

6. BUSINESS BENEFITS & VALUE PROPOSITION

- **Centralized Lead Management:** All leads in one place with clear status tracking
- **Increased Conversion Rates:** Automated reminders ensure no lead falls through
- **Time Savings:** Quick customer lookup eliminates manual entry
- **Revenue Tracking:** Clear visibility into daily, weekly, monthly revenue
- **Customer Retention:** Birthday/anniversary reminders encourage repeat purchases
- **Multi-channel Integration:** Single dashboard for all sales channels
- **Customized Billing:** Flexible invoicing for different customer needs
- **Inventory Control:** Real-time stock tracking prevents overselling
- **Data-Driven Decisions:** Comprehensive reports and analytics
- **Scalability:** Support for unlimited customers, orders, and products

7. SUCCESS METRICS & KPIs

3-Month Targets: Lead-to-Order Conversion 55% (from 40%), Average Order Value Rs.4,000 (from Rs.3,500), Customer Retention 55% (from 35%), Order Fulfillment 2-3 days, System Uptime 99%

6-Month Targets: Conversion Rate 70%, Average Order Rs.4,500, Retention 75%, Fulfillment 1-2 days, Response Time <1 hour, System Uptime 99.9%, Monthly Recurring Orders 50%

8. CONCLUSION

The AndSoOn CRM System represents a comprehensive solution designed specifically for the gift setting and premium gifting business. By integrating lead management, customer relationship tracking, inventory control, and automated billing, the system empowers AndSoOn to scale operations efficiently while maintaining excellent customer service. The multi-channel integration ensures no sales opportunity is missed, while robust reporting and analytics provide insights for continuous improvement.

Let's Get Started!

If you're ready to move forward, we would be happy to schedule a quick call or meeting to finalize the details.
